

Climatix™

Climatix controllers POL42X.70/STD

For controlling, switching and monitoring functions

The Climatix 42X.70/STD controllers are optimized with Inbuilt HMI for air handling units, rooftop units, chillers and heat pumps, available for display, unit configuration and operation.

Controller types

POL421.70/STD

POL422.70/STD

POL424.70/STD

Main features

The Climatix 42X.70/STD controllers provide the following main features:

- 6 predefined keys and organizable icons for ease of operation
- User-friendly segmented FSTN LCD interface with blue backlight
- 5-digit character display
- Specialized icons for HVAC plant
- Programmable attributes of icons via Climatix tools
- Grouped parameter for convenient index
- Power supply AC 24 V or DC 24 V
- DC 24 V and DC 5 V on-board power supplies for active sensors
- 3 analog inputs specific for temperature sensor
- 2 configurable inputs as digital input / DC 0...10 V input / temperature sensor
- 3 configurable outputs as DC 0...10 V analog output / digital output for off-board load
- 4 digital inputs specific for potential-free contacts
- 1 digital input for potential-free contact / fan speed measurement
- 1 digital input galvanic isolated (AC 115...230 V)
- 5 relay outputs (4 NO contacts, 1 changeover switching type)
- 2 triac outputs (AC 24 V / 115 V / 230 V) or 2 relay outputs (NO contacts)
- 1 stepper motor drive for electronic expansion valve or PWM output ^{1) 2)}
- On-board Modbus RTU over RS485 for Third-party bus communication
- Process bus for network functionalities (based on KNX protocol) ^{2) 3)}
- Local service connector for user interface and PC tools (supporting USB)
- SD card interface for application and operating system upgrade
- Operating temperature range is -20...60 °C
- Powerful service tools are available to facilitate commissioning

Application

LCD Display

The FSTN LCD display is subdivided into several logical blocks, containing symbols and characters associated with specific operating states to provide real time information.

All icons can be programmed with the following status via SCOPE and SAPRO (regardless of whether the application controls the Inbuilt HMI):

- Fixed display
- Flashing (interval: 500 ms)
- Non display

Segment introduction

No.	Designation
1	Character segment – text composed of characters
2	Menu segment – main configuration menu
3	Communication segment – flashing icon indicates a bus problem occurred between Inbuilt HMI and controller
4	Mode segment – displayed icon indicates the mode is operating
5	Device segment – displayed icon indicates the device is working
6	Engineering unit segment – displayed icon indicates the unit of a value

Icon introduction

Icon	Explanation	Icon	Explanation
Engineering unit segment		Device segment

Character unit segment

The character unit segment is formatted and styled as follows:

First line		- Max. 5 characters *) - Left aligned
Second line		- Max. 4 numbers

*) If more than 5 characters display on the first line, the entire line of characters scrolls forward.

- In menu page of Information, max. 20 characters scroll forward.
- In menu page of Alarm, max.10 characters scroll forward.

The numbers are displayed on both lines as follows:

Numbers on the first line		1	2	3	4	5	6	7	8	9
Numbers on the second line	0	1	2	3	4	5	6	7	8	9
Numbers represented	0	1	2	3	4	5	6	7	8	9

The special symbols are displayed on the first line as follows:

Special symbols on the first line	+	-	*	.	_	\	/
Numeral represented	+	-	*	.	_	\	/

Latin letters

The Latin letters are displayed on the first line as follows:

Disposal

The devices are considered electronics devices for disposal in terms of European Directive 2012/19/EU and may not be disposed of as domestic waste.

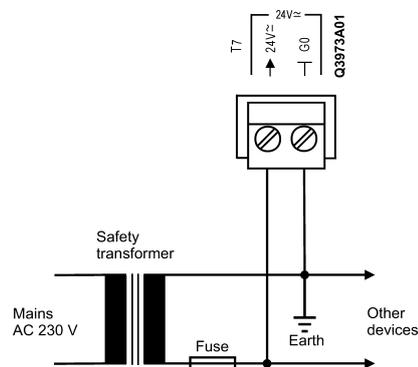

- Dispose of the device via the channels provided for this purpose.
- Comply with all local and currently applicable laws and regulations.

Mounting instructions

- The product is used for flush panel mounting with a front mounting kit.
- Do not mount the product in recesses, shelving, behind curtains or doors or above or near direct heat sources.
- Avoid exposure to direct sunlight and draught.
- Seal the conduit on the device side, as currents of air in the conduit can affect the sensor reading.
- Observe the admissible ambient conditions.

Ordering

Please specify the quantity, product name, ASN and SSN when ordering. The following information is an example:

Minimum Order Quantity	Product name	ASN (product no.)	SSN (stock no.)
18	Climatix 400 controller with Inbuilt HMI	POL421.70/STD	S55394-C217-A100
18	Climatix 400 controller with Inbuilt HMI	POL422.70/STD	S55394-C227-A100
18	Climatix 400 controller with Inbuilt HMI	POL424.70/STD	S55394-C247-A100

In order to protect against accidental contact with relay connections at voltages above $42 V_{\text{eff}}$, the device must be installed in an enclosure (preferably a control panel). It must be impossible to open the enclosure without the aid of a key or tool. AC 230 V cables must be double-insulated against safety extra-low voltage (SELV) cables.

Do **not** mix SELV / PELV and line voltage on the same terminal.

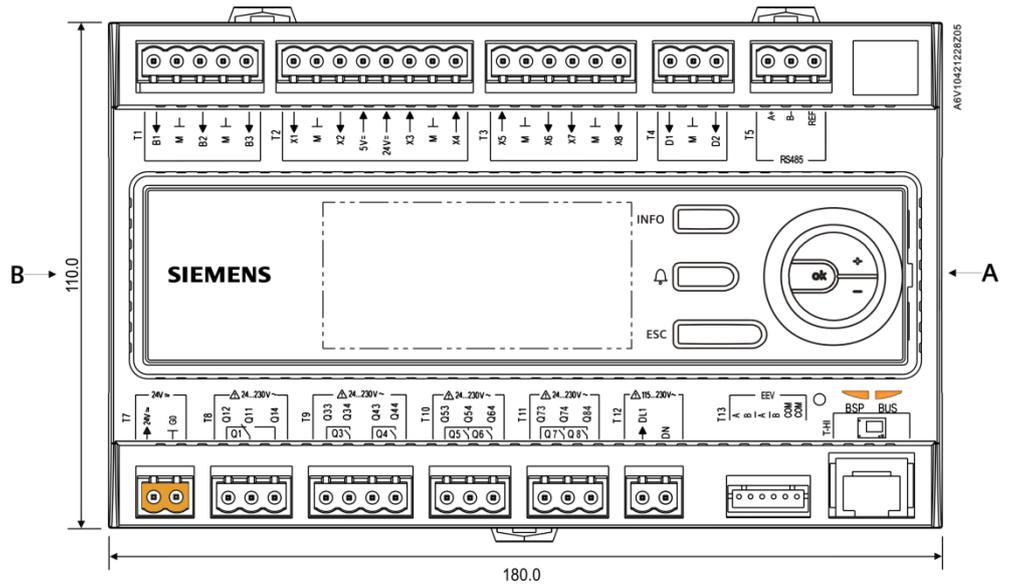

Use external protection for inductive load of relay outputs.

Use external fuse for over current protection of relay and triac outputs.

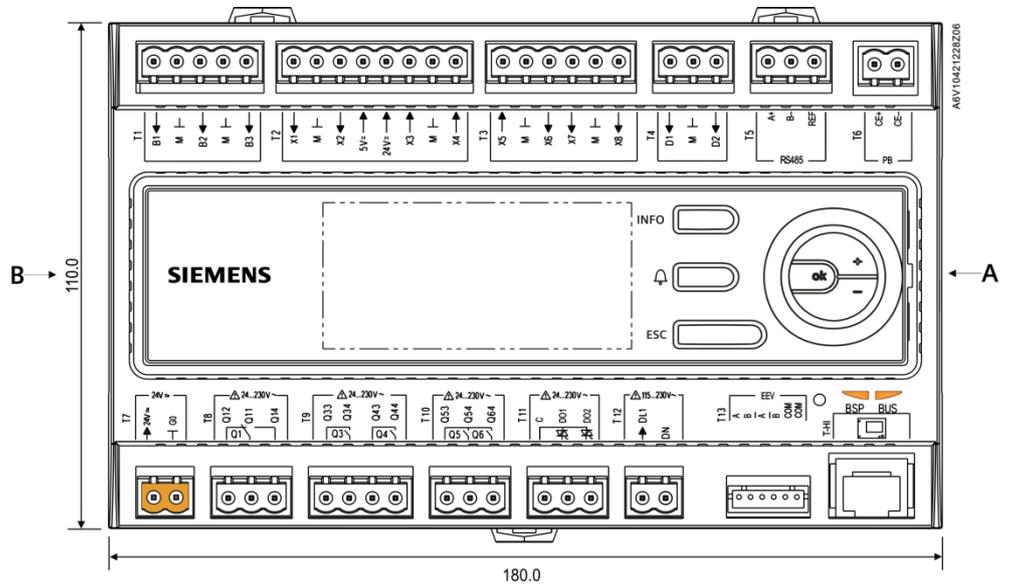

Avoid negative voltage on analog inputs, because the measured ADC values are undefined. The accuracy of the 10 V analog inputs is valid for values above 100 mV.
